Cedar City, March 25.—There is an epidemic of whooping cough among the children of this place, with some scarlet fever in mild form. The family of Albert Nelson was quarantined on suspicion of diphtheria, some of the m/mbers having been sick with sore throats, and one child having died with what they supposed to be memoranous croup. However, there have been no new developments.

Ray Terry, a young man from the northern end of the state, who has since childhood been deprived of the use of his lower limbs through paralysis, underwent an operation this week for the amputation of one leg. The other will be taken off as soon as the patient is sufficiently recovered to stand it. As the young man is without a home and dependent on the charity of the people, a subscription was taken up and money raised to pay his expenses for the present, and it is probable that another will be taken up with the object of getting him artificial limbs.
